

# DR. RAGHDA ELGHAZAWY

General Practitioner | Aesthetic Doctor

## About Me

GMC-registered General Practitioner with a background in NHS general practice and specialist training in aesthetic medicine. Offering advanced skin and injectable treatments under my own brand, Sculpted by Dr Raghda. Trained in medical aesthetics with Derma Medical, I focus on delivering natural and safe results using a full-face approach tailored to each patient.

I believe aesthetic medicine is a true extension of medical care. It's not just about appearance – it's about confidence, empowerment, and supporting overall wellbeing. My approach is always ethical, patient-centred, and grounded in medical safety, ensuring that every treatment enhances both confidence and natural beauty.

Availability & Work Preferences

I am currently seeking a position within an established aesthetic clinic for 1–2 days per week, ideally on Wednesdays and Thursdays. This schedule allows me to balance ongoing commitments while dedicating focused, high-quality time to my patients. I'm particularly drawn to clinics with a strong reputation for safety, ethical practice, and excellent patient care, where I can continue to grow professionally, contribute my skills, and collaborate with like-minded practitioners.
