HOBBIES

- Feeding stray animals.
- Volunteering at health camps.
- Attending Conferences.

TEACHING EXPERIENCE

Jan 2017 - Mar 2024
/ UK and Pakistan

Most recently in 2023, I taught medical students at Royal Free Hospital during my dermatology posting as a medical support worker. I was also involved in simulation teaching with fellows and preparing new medical staff for clinical emergencies by presenting such topics.

In Pakistan, I have been involved in multiple informal teaching sessions of nurses, medical students, and lady health workers as a medical officer throughout my career. Especially, during my tenure at the basic health unit in 2019-2020, I held teaching sessions for lady health workers to record vitals, identify danger signs in a baby, etc.

During my posting dermatology in 2022, I was in a rota of teaching medical students about basic dermatology and infestations.

ACHIEVMENTS AND AWARDS

AWARDED LICENSE TO THE BASIC HEALTH UNIT FOLLOWING SURPRISE HEALTH AUDIT.

Oct 2018 / Pakpattan, Pakistan

The aim of getting a license was to provide free treatment by the government after passing health checks. I was in-charge medical officer of my basic health unit in 2018. There is only one doctor in that kind of center and the rest are nurses, dispensers, and lady health workers. Me and my staff worked as a team and with the collaboration of my administrative plus clinical skills, we were able to pass the series of government health checks.

REFERENCE

References available upon request

As a seasoned medical professional, I bring a robust seven-year track record of clinical expertise garnered across the dynamic landscapes of the UK and Pakistan's healthcare sectors. My journey has seen me thrive in both clinical settings and public health roles within governmental and private institutions. Dermatology has been a focal point of my career, with two years dedicated to this specialty, including a significant tenure at the prestigious NHS. My ambition is firmly set on becoming a General Practitioner with a special interest in Dermatology. Renowned for my patient-centric approach and my ability to foster a collaborative environment among peers, I am now focused on expanding my professional portfolio as I transition toward my chosen specialty.

AUDIT

Mar 2023
London

PIFU (PATIENT INITIATED FOLLOW-UP) EVALUATION OF PROJECT IN ORDER TO DISCHARGE PATIENT ON CHRONIC PATHWAY.

Aim & measure of the change:

Care is initiated by patients or their caregivers rather than being contacted automatically. Whether we were able to control and save the NHS appointments by a large number or not? In the end, I presented in a presentation in front of the national PIFU group. I worked under the supervision of a senior who had implemented this national project at the Royal Free Dermatology department.

Conclusions/ Actions:

After my audit on PIFU, it was encouraged that staff else than consultants should be adding patients on PIFU for more effectiveness of the project. Technical flaws and necessary updates were outdrawn and implemented. There was a glitch in the system for the discharge pathway and the outcome of this project was a success as we were able to control and save the NHS appointments by a large number.
